

# ACDI + PaperCut Fax Server Integration with ETHERFAX

Recognizing the need to protect confidential patient data and information, PaperCut MF's security provides peace of mind for healthcare professionals around the world. Physical measures protect documents throughout their entire lifecycle while end-to-end encryption prevents breaches and keeps data secure.

## Why Use the ACDI + PaperCut Fax Server Integration with ETHERFAX?

Powerful data extraction transforms unstructured documents into structured, searchable data that can be easily integrated into workflow processes and applications. Use the power of Generative AI to quickly and easily interrogate a document for any specific type of insights. AI Insights can convert an incoming fax into a searchable PDF, OCR the document, and use Gen AI to classify, summarize, and extract data – creating the off-ramp from fax; and the on-ramp to interoperability.

*Only available for PaperCut MF 21.2 versions and above*

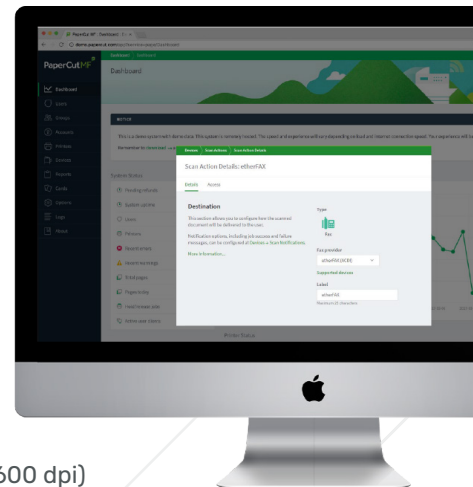

*Currently only available for Windows Servers*

*Users must have current M&S to add this connector*

*For a full list of supported models please visit: [papercut.com](http://papercut.com)*

## Features & Benefits

- Reduce costs
- Maximize productivity
- Improve security
- SEN enabled
- No interoperability required
- Increased transmission success
- Supports high-resolution (600 dpi) and color
- No change to the user experience, no retraining
- ETHERFAX's secure, cloud-based, and encrypted data exchange solutions operate in a HIPAA and SOC 2® compliant environment that is both HITRUST CSF® and PCI DSS certified
